PROFESSIONAL SUMMARY

Dedicated Full-Stack Developer and recent Informatics graduate with strong expertise in building scalable web applications using Laravel, React, and TypeScript. Experienced in designing robust relational databases and RESTful APIs to support end-to-end business solutions, including e-commerce platforms and inventory management systems. Complemented by cross-platform mobile development skills (Flutter), organizational leadership experience, and practical experience in IT support, ensuring smooth technical workflows and collaborative problem-solving.

EDUCATION

Universitas Atma Jaya Yogyakarta August 2022 – August 2026
Bachelor's Degree in Informatics — Yogyakarta

- Relevant Coursework: Software Engineering, Web Development, Relational Database Design, RESTful API Design, and Network Engineering.

PROFESSIONAL EXPERIENCE

Freelance 2023 – Present
Web & Mobile Developer — Remote

- Designed, developed, and delivered custom web and cross-platform mobile applications for a range of clients, managing projects end-to-end from requirement gathering to deployment.
- Built responsive web solutions using Laravel, React, and TypeScript, alongside cross-platform mobile apps with Flutter and Dart integrated via RESTful APIs.
- Collaborated directly with clients to translate business needs into technical specifications, ensuring timely delivery and high client satisfaction.

Hotel Khas Malioboro Yogyakarta December 2025 - February 2026
IT Support Intern — Yogyakarta

- Configured and deployed Android TV systems across guest rooms, ensuring seamless entertainment services and optimal user experience.
- Conducted regular maintenance and troubleshooting of Uninterruptible Power Supply (UPS) units to prevent critical system downtimes during power fluctuations.
- Set up, configured, and maintained local area networks (LAN/WLAN) to ensure stable and secure internet connectivity for both hotel guests and staff.
- Provided prompt daily technical support to resolve hardware and software issues, maintaining overall operational efficiency for the hotel management.

ORGANIZATIONAL EXPERIENCE

KOPMA UAJY (Koperasi Mahasiswa Universitas Atma Jaya Yogyakarta) July 2024 – May 2025
Operational Coordinator

- Coordinated and oversaw day-to-day operational activities of the student cooperative, ensuring smooth execution of organizational programs and initiatives.
- Collaborated with cross-functional teams to plan, organize, and evaluate cooperative operations, contributing to improved efficiency and member engagement.

TECHNICAL PROJECTS

Hajj & Umrah Travel Management System | React.js, Laravel, MySQL, Bootstrap

- Designed and developed a comprehensive full-stack web application to streamline administrative and operational processes for travel agencies.
- Architected robust backend logic using Laravel and integrated it with a highly responsive Single Page Application (SPA) built with React.js.
- Built essential modules including automated payment tracking, pilgrim profile management, document processing, and departure scheduling.
- Implemented secure Role-Based Access Control (RBAC) and developed interactive dashboards to provide the management team with real-time operational visibility.

Mobile Point of Sale (POS) System for Car Wash | Flutter, Dart, Laravel, MySQL, REST API

- Developed a cross-platform mobile POS application using Flutter and Dart, integrated with a Laravel backend to digitalize and streamline car wash business operations.
- Engineered core features including dynamic service catalogs, customer membership tier management, and real-time sales reporting analytics.
- Designed and implemented scalable RESTful APIs to ensure seamless and secure data synchronization between the mobile frontend and the backend server.
- Replaced manual bookkeeping with an intuitive digital interface, significantly enhancing transaction processing speed and data accuracy.

Full-Stack F&B POS System & Web Admin | Flutter, Laravel, MySQL, REST API

- Developed a cross-platform mobile Point of Sale (POS) application using Flutter and Dart to digitalize transactions and streamline daily operations for a local F&B business.
- Designed and built a comprehensive web-based admin dashboard to manage product catalogs, monitor real-time sales, and generate business reports.
- Engineered robust RESTful APIs to ensure seamless data synchronization between the mobile POS application and the central database.
- Implemented secure user authentication using Firebase Auth and Google Sign-In, protecting business data and controlling staff access.

Consignment E-Commerce Platform

- Engineered a full-stack e-commerce web application dedicated to the consignment and sale of second-hand goods.
- Developed a robust backend architecture using Laravel (PHP) and built dynamic, interactive user interfaces utilizing React, JavaScript, and TypeScript.

Inventory Management Web Application

- Built a comprehensive web application for real-time inventory recording and tracking.
- Designed underlying relational database schemas using foreign keys and SQL, integrated with a Laravel backend and RESTful APIs to ensure data integrity across goods and transaction tables.

TECHNICAL SKILLS

Web Technologies & Frameworks

Laravel, React.js, RESTful APIs, Flutter, Vite, JWT/Sanctum

Programming Languages

JavaScript, TypeScript, PHP, SQL, T-SQL, Dart, C/C++

Databases

Relational Database Design, SQL Server, MySQL, Firebase

Tools & Concepts

Full-Stack Development, IT Support Troubleshooting, Git / GitHub, Docker, Linux, VPS Deployment, Nginx/Apache, Postman, Composer, npm, Technical Documentation, Team Coordination

---

LANGUAGES

Indonesian — Native English — Professional Working Proficiency
